

JAGANNATH
UNIVERSITY

Department of Agriculture

Circular

No./Ag/JNU/SP-2

Dated: 27.06.2019

It is inform to all the Odd Semester students of B.Sc.(Hons) Agriculture for registration of Value Added Courses(VAC). The registration will be starting from 01/07/2019 to 11/07/2019. The classes will be starting from August 08, 2019. The students can contact to Dr S.L.Sharma for further queries.

The following courses are offering for respective semester-

- (1) Organic Livestock Farming Benefits, Principles and Challenges. –(III Semester)
- (2) Epidemiology and Disease Management Plant–(V Semester)
- (3) Conservation Agriculture for Enhancing Productivity and Resource use Efficiency in Major Cropping Systems. –(VII Semester)

Jagannath University Jaipur is offering Value Added Certificate Courses that are being conducted by various departments to complement students' knowledge and skills in their field of study. Courses offered are chosen based on current trends, relevance and value in the job-market.

Duration: 32 Credit hours

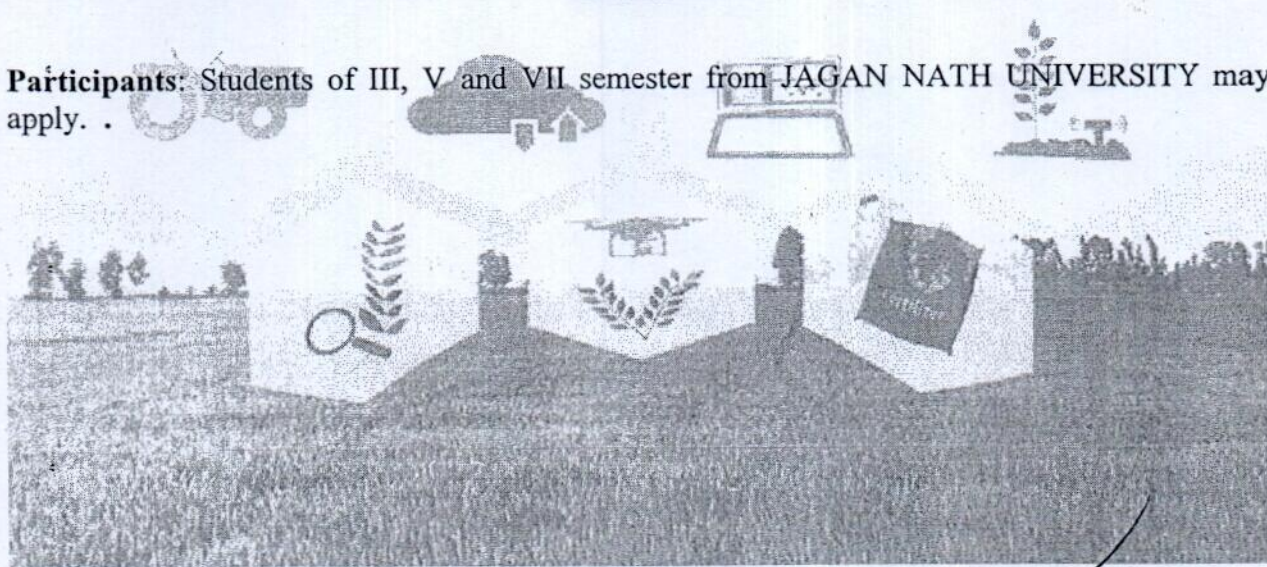

Timings: 04:30 pm to 05:30 pm

Date of Commencement: 08 August, 2019

Registration & other details: Registration will open from 01.07.2019 to 11.07.2019 through a link on website www.jagannathuniversity.org Students should contact Prof. S. L. Sharma (I/c value added courses programme) for further queries.

Course Certificate: Certificate mentioning acquired grade will be provided as per performance in test at the end of Course.

Participants: Students of III, V and VII semester from JAGAN NATH UNIVERSITY may apply.

Semester	III
Course Title	VACAG-302 Organic Livestock Farming Benefits, Principles and Challenges
Objectives	<p>(i) To fill the existing knowledge gap with regard to the sustainability, challenges, and perspectives of the organic livestock sector, as well as regarding its contribution to the agrifood system's sustainability. Moreover, this study is also aimed at-</p> <p>(ii) Providing strategies and insights that will help stakeholders and policy makers to improve the sustainability of both the organic livestock sector and that of the whole food system.</p>
Course Details	<p>Introduction to organic livestock farming. Historical development of organic livestock farming. Characteristics of organic livestock farming: Breeds and Breeding, Feeds and Feeding, Housing, Disease prevention, Treatment, Challenge of organic livestock farming in India conditions: Factors influencing organic livestock farming success: Regulation and certification bodies, Animal nutrition : Legislation and market.</p> <p>Opportunity for organic livestock farming in India accepted by consumers. Encourage biodiversity. Benefits of organic livestock farming: Environment, Animal health, Nutrient cycling, Weed control, Preparing the ground for cropping. Organic certification: Major Certifying bodies which monitor the standards for organic production & having world wide acceptance are- EU Regulation(1804/1999), Organic Food Products Acts (OFPA) of USA, Draft Guidelines of Codex/ WHO/FAO, International Federations of Organic agricultural Movements(IFOAM).</p> <p>Steps required for certification. National standards for organic livestock production in India: Landscape, Fertility policy, Animal husbandry management, Length of the conversion period, Brought in Animal, Breeds and Breeding, Mutilations, Animal nutrition, Veterinary medicine, Transport and Slaughter.</p>

Semester	V
Course Title	VACAG-502 Plant Epidemiology and Disease Management
Objectives	<ul style="list-style-type: none"> • To learn a thorough understanding of important principles and concepts of plant epidemiology • To analysis diseases severity. • To learn diseases management • To analysis of host and pathogen interaction <p>To learn forecasting of diseases</p>
Course Details	<p>Modules 1 (10 Hrs) Introduction, definition, concept and history of epidemiology. Diagnosis of plant diseases. Methods of plant disease measurement, host growth stages, disease severity-incidence relationships, diagram and field keys, field sampling. Environmental influence on disease: Influences on pathogen ecology vs. influences on host; Foliar diseases, soil borne diseases and post-harvest diseases . Disease management- basic principles, biological, chemical and cultural disease management.</p> <p>Modules 2(10 Hrs) Inoculum Potential: Diseases development ,penetration of the host, Interaction between host and pathogen. Pathogen DISPERSAL: Pathogen and Transport Microbiology of the atmosphere Aerial and soil pathogens, disease gradients, dissemination, quantifying inoculum of airborne and soil borne pathogens. Management With Chemicals Pathogen insensitivity to chemical and coping with fungicide resistance.</p> <p>Modules 3(Hrs marks) Temporal analysis of epidemic - Description and comparison of disease progress curves Disease models, disease progress and rates Dispersal gradients of aerially dispersed pathogens .Genetic basis of the epidemics: Epidemiologic and genetic concepts, partial resistance, stabilizing selection, aggressiveness, fitness, multiline, and varietal mixtures .Forecasting and simulation of epidemic –Method of diseases forecasting, Diseases triangle - pathogen factor, host factor and environment factor, Computer based diseases forecasting .</p>

Semester	VII
Course Title	VACAG-702 Conservation Agriculture Practices for Enhancing and Resources use Efficiency in Major Cropping System
Objectives	<ul style="list-style-type: none"> • To study the different cropping System • To study Conservation Agriculture procedures • To analysis mitigation of climate change effect • To learn manage natural and economical resources • To study sustainable farming and organic farming
Course Details	<p>Cropping system: Definition, Principles and basic concepts. Classification of cropping system - Mono cropping, intensive cropping, multiple cropping, mixed cropping. Major cropping systems prevailing in India and Rajasthan for different agro eco systems. Complementary and competitive interaction in different cropping system - light, nutrient, water and weed. Cropping system management : agronomic requirement for crops and cropping system selection of crops and varieties, tillage and land shaping, plant population and crop geometry.</p> <p>Cropping system management: agronomic requirement for crops and cropping system - water management, soil fertility management and plant protection. Indices for evaluation of cropping system - land use, yield advantage and economy farming system: definition, principles and concepts and factors influencing choice and size of enterprises. Scope and advantages of integrated farming system. Allied enterprises for wetland, irrigated upland and dryland - selection and management and their interaction. .CSI –Definition, characteristics and impact of climate on the different cropping system</p> <p>Organic farming –definition, Procedure, organic certification. Precious farming. Resource recycling in integrated farming system.. Integrated Farming System evaluation indicators Integrated farming system - models for wetland, irrigated upland and dry land eco system. Cost reduction technologies and non monetary inputs in integrated farming system. LEIA and HEIA - principles and concepts and Labour management in integrated farming system. Conservation agriculture and environmental impact of integrated farming system.</p>

SYLLABUS

Name of Course- VACAG-302 Organic Livestock Farming Benefits, Principles and Challenges

Objective: The objectives of this course-

- (i) To fill the existing knowledge gap with regard to the sustainability, challenges, and perspectives of the organic livestock sector, as well as regarding its contribution to the agrifood system's sustainability. Moreover, this study is also aimed at-
- (ii) Providing strategies and insights that will help stakeholders and policy makers to improve the sustainability of both the organic livestock sector and that of the whole food system.

Course content:

Module 1 (10Hr)

Introduction to organic livestock farming. Historical development of organic livestock farming. Characteristics of organic livestock farming: Breeds and Breeding, Feeds and Feeding, Housing, Disease prevention, Treatment. Challenge of organic livestock farming in India conditions. Factors influencing organic livestock farming success: Regulation and certification bodies, Animal nutrition : Legislation and market.

Module 2 (12Hr)

Opportunity for organic livestock farming in India accepted by consumers. Encourage biodiversity. Benefits of organic livestock farming: Environment, Animal health, Nutrient cycling, Weed control, Preparing the ground for cropping, Organic certification: Major Certifying bodies which monitor the standards for organic production & having world wide acceptance are- EU Regulation(1804/1999), Organic Food Products Acts (OFPA) of USA, Draft Guidelines of Codex/ WHO/FAO, International Federations of Organic agricultural Movements(IFOAM).

Module 3 (10Hr)

Steps required for certification. National standards for organic livestock production in India: Landscape, Fertility policy, Animal husbandry management, Length of the conversion period.

Brought in Animal, Breeds and Breeding, Mutilations, Animal nutrition, Veterinary medicine, Transport and Slaughter.

Outcome:

Organic livestock farming (especially its organic principles than regulations) may be a useful strategy to overcome the challenges of the agricultural sector (sustainability, food security, and food safety) while matching with consumers' tendencies (animal welfare, health, environmental protection, etc.). Furthermore, organic livestock farming could be also an interesting strategy for the eternal rural development issue and the farms' decreasing profitability. However, the combination of complying with organic regulations and objectives and principles of organic farming while increasing overall sustainability is not an easy task. Finally, and more urgently, special attention must be paid on the marketing strategies of organic products (organic plus products and marketing channels) since this is the main constraint of the sector, and it is the point where there are more possibilities for improvement for both farm profitability and overall sustainability of the food system.

MM-50

Name of Course- VACAG-302 Organic Livestock Farming Benefits, Principles and Challenges

Q 1. Characteristics of organic livestock farming ?

Q 2. Who controls organic certification? And who carries out organic certification?

Q 3. What are organic livestock farming standards? And can we use veterinary medicines in organic livestock production?

Q 4. What about livestock housing? And can we use non-organic feed if I do not have enough organic winter feed?

Q 5. What Are The Benefits Of Organic Farming?

Report on Value Added Course

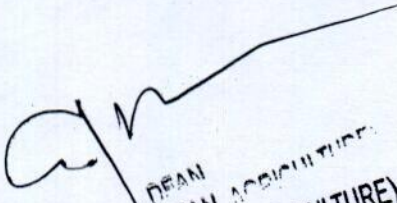

VACAG-302 Organic Livestock Farming Benefits, Principles and Challenges

A Value Added Course (VAC) on “Organic Livestock Farming Benefits, Principles and Challenges” was conducted during III semester of Session: 2019-20 at Chaksu Campus of the university. The announcement of course was announced on 27.06.2019 by the Dean Faculty of Science. In response to this circular 79 students completed the course. The classes of course were started from 08/08/2019. The course brochure and Syllabus was given to all the students and it was covered in 32 credit hours.

The main objectives of this course were to fill the existing knowledge gap with regard to the sustainability, challenges, and perspectives of the organic livestock sector, as well as regarding its contribution to the agri-food system's sustainability. Providing strategies and insights that will help stakeholders and policy makers to improve the sustainability of both the organic livestock sector and that of the whole food system.

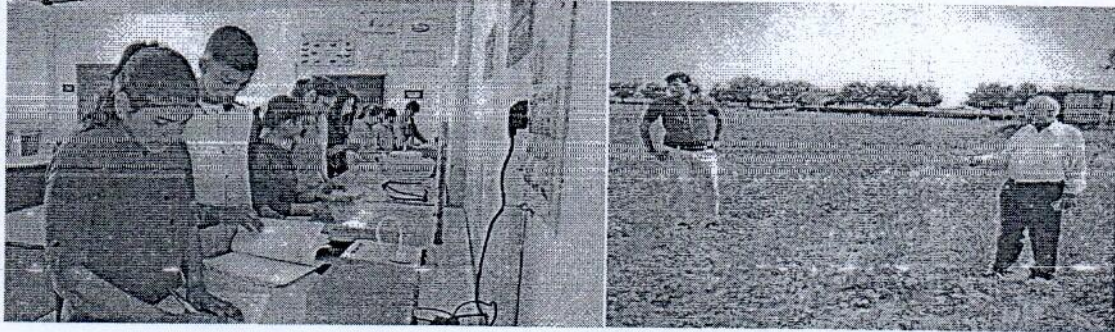

After completion of this course students able to and understand to Regulation and certification bodies, Animal nutrition: Legislation and market. Benefits of organic livestock farming: Environment, Animal health, Nutrient cycling, Weed control, Preparing the ground for cropping, Organic certification: Major Certifying bodies which monitor the standards for organic production. Organic livestock farming (especially its organic principles than regulations) may be a useful strategy to overcome the challenges of the agricultural sector (sustainability, food security, and food safety) while matching with consumers' tendencies (animal welfare, health, environmental protection, etc.).

SYLLABUS

Name of Course- VACAG-502 Plant Epidemiology and Disease Management

Objectives

- To learn a thorough understanding of important principles and concepts of plant epidemiology
- To analysis diseases severity.
- To learn diseases management
- To analysis of host and pathogen interaction
- To learn forecasting of diseases

Content

Modules 1 (10 Hrs)

Introduction, definition, concept and history of epidemiology. Diagnosis of plant diseases. Methods of plant disease measurement, host growth stages, disease severity-incidence relationships, diagram and field keys, field sampling. Environmental influence on disease: Influences on pathogen ecology vs. influences on host; Foliar diseases, soil borne diseases and post-harvest diseases . Disease management- basic principles, biological, chemical and cultural disease management.

Modules 2(10 Hrs)

Inoculum Potential: Diseases development ,penetration of the host, Interaction between host and pathogen. Pathogen DISPERSAL: Pathogen and Transport Microbiology of the atmosphere Aerial and soil pathogens, disease gradients, dissemination, quantifying inoculum of airborne and soil borne pathogens. Management With Chemicals Pathogen insensitivity to chemical and coping with fungicide resistance.

Modules 3(Hrs marks)

Temporal analysis of epidemic - Description and comparison of disease progress curves Disease models, disease progress and rates Dispersal gradients of aerially dispersed pathogens .Genetic basis of the epidemics: Epidemiologic and genetic concepts, partial resistance, stabilizing selection, aggressiveness, fitness, multiline, and varietal mixtures .Forecasting and simulation of epidemic -Method of diseases forecasting, Diseases triangle -pathogen factor, host factor and environment factor, Computer based diseases forecasting .

Outcome

Certified True Copy
Registrar
Jagan Nath University, Jaipur

DEAN
FACULTY OF SCIENCE (S&H) UNIT-2
JAGANNATH UNIVERSITY
CHAKS, JAIPUR (R.A.) INDIA

- Basic understanding of epidemiological theory and concepts.
- To trace the current areas of epidemiological.
- Practical applications of epidemiology in plant disease management
- Analysis the different factor of disease development
- Forecast the diseases using different method

TIME TABLE

Value Added Course (VAC)

Class Schedule for Semester V Sec C

Session 2019-20

VACAG-502 Plant Epidemiology and Disease Management

Lecture No.	Date	Time
1	9/08/2019	04:30 pm to 05.30 pm
2	10/08/2019	04:30 pm to 05.30 pm
3	13/08/2019	04:30 pm to 05.30 pm
4	14/08/2019	04:30 pm to 05.30 pm
5	16/08/2019	04:30 pm to 05.30 pm
6	17/08/2019	04:30 pm to 05.30 pm
7	20/08/2019	04:30 pm to 05.30 pm
8	21/08/2019	04:30 pm to 05.30 pm
9	22/08/2019	04:30 pm to 05.30 pm
10	23/08/2019	04:30 pm to 05.30 pm
11	27/08/2019	04:30 pm to 05.30 pm
12	29/08/2019	04:30 pm to 05.30 pm
13	30/08/2019	04:30 pm to 05.30 pm
14	31/08/2019	04:30 pm to 05.30 pm
15	3/09/2019	04:30 pm to 05.30 pm
16	4/09/2019	04:30 pm to 05.30 pm
17	5/09/2019	04:30 pm to 05.30 pm
18	6/09/2019	04:30 pm to 05.30 pm
19	7/09/2019	04:30 pm to 05.30 pm
20	11/09/2019	04:30 pm to 05.30 pm
21	12/09/2019	04:30 pm to 05.30 pm
22	13/09/2019	04:30 pm to 05.30 pm
23	14/09/2019	04:30 pm to 05.30 pm
24	17/09/2019	04:30 pm to 05.30 pm
25	18/09/2019	04:30 pm to 05.30 pm
26	19/09/2019	04:30 pm to 05.30 pm
27	20/09/2019	04:30 pm to 05.30 pm
28	21/09/2019	04:30 pm to 05.30 pm
29	24/09/2019	04:30 pm to 05.30 pm
30	1/10/2019	04:30 pm to 05.30 pm
31	3/10/2019	04:30 pm to 05.30 pm
32	4/10/2019	04:30 pm to 05.30 pm

Value Added Course

Viva based Paper

Semester V

Session 2019-20

MM-50

Name of Course- VACAG-502 Plant Epidemiology and Disease Management

1. Define the epidemiology. Explain the history of the epidemiology.
2. Explain the method of the plant diseases measurement .
3. Explain the important names of the chemicals to control pathogen.
4. What is the diseases triangle .Explain the content of diseases triangle.
5. Explain the method of diseases forecasting.

Report on Value Added Course

VACAG-502 Plant Epidemiology and Disease Management

A Value Added Course (VAC) on **Plant Epidemiology and Disease Management** was undertaken during II semester of Session: 2019-20 at Jagannath University Jaipur Chaksu Campus. The announcement of course was announced on 27.06.2019 by the Dean Faculty of Science. In response to this circular 117 students completed the course. The classes of course were started from 08/08/2019. The course brochure and syllabus were given to all the students and it was covered in 32 credit hours.

Plant Epidemiology and Disease Management

Plant Epidemiology and Disease Management is branch of the plant pathology . it deal with the measure the severity of disease. It is modern aspect of the plant pathology. It is emphasis diseases measure method ,method to identify the epidemic area of particular diseases, classify the diseases, disease severity-incidence relationships, diagram and field keys, field sampling. Environmental influence on disease: Influences on pathogen ecology vs. influences on host; Foliar diseases, soil borne diseases and post-harvest diseases Inoculum Potential: Diseases development, penetration of the host, Interaction between host and pathogen. Pathogen DISPERSAL: Pathogen and Transport Microbiology of the atmosphere Aerial and soil pathogens, disease gradients, dissemination, quantifying inoculum of airborne and soil borne pathogens.. In this course student learn to identify the diseases and analysis different symptoms of the major diseases and identify the major control practices to control such diseases. They learned temporal analysis of epidemic, disease progress and rates Dispersal gradients of aerially dispersed pathogens, genetic basis of the epidemics: Epidemiologic and genetic concepts, partial resistance, stabilizing selection, aggressiveness, fitness, multiline, and varietal mixtures.

SYLLABUS

Name of Course – VACAG-702 Conservation Agriculture Practices for Enhancing and Resources use Efficiency in Major Cropping System

Objective

- To study the different cropping System
- To study Conservation Agriculture procedures
- To analysis mitigation of climate change effect
- To learn manage natural and economical resources
- To study sustainable farming and organic farming

Content

Module 1. (12 Hours)

Cropping system: Definition, Principles and basic concepts. Classification of cropping system - Mono cropping, intensive cropping, multiple cropping, mixed cropping. Major cropping systems prevailing in India and Rajsthan for different agro eco systems. Complementary and competitive interaction in different cropping system - light, nutrient, water and weed. Cropping system management : agronomic requirement for crops and cropping system selection of crops and varieties, tillage and land shaping, plant population and crop geometry.

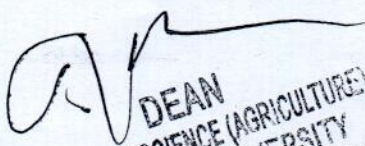

Module 2 (10 Hours)

Cropping system management: agronomic requirement for crops and cropping system - water management, soil fertility management and plant protection. Indices for evaluation of cropping system land use, yield advantage and economy farming system: definition, principles and concepts and factors influencing choice and size of enterprises. Scope and advantages of integrated farming system. Allied enterprises for wetland, irrigated upland and dryland - selection and management and their interaction. CSI - Definition, characteristics and impact of climate on the different cropping system.

Module 3 (10 Hours)

Organic farming - definition, Procedure, organic certification. Precious farming. Resource recycling in integrated farming system.. Integrated Farming System evaluation indicators Integrated farming system - models for wetland, irrigated upland and dryland eco system. Cost reduction technologies and non monetary inputs in integrated farming system. LEIA and HEIA - principles and concepts and Labour management in integrated farming system. Conservation agriculture and environmental impact of integrated farming system.

Outcome

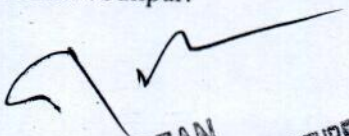

DEAN
FACULTY OF SCIENCE (AGRICULTURE)
JAGANNATH UNIVERSITY
CHAKSU, JAIPUR (RAJ.) INDIA

Certified True Copy
Registrar
Jagan Nath University, Jaipur

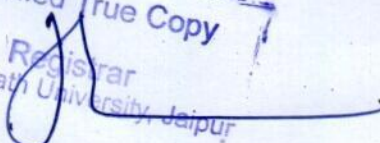

- Adopt of conservation System
- To Manage natural sources and economical sources
- To Set up Climate Smart System
- Adopt weed ,diseases and pest Management strategies for conservation agriculture
- To apply Precision farming, organic farming and other related areas supporting conservation agriculture
