

Greenery

The university campus believes that a clean, green and a pollution free environment provide an ideal back drop for an effective learning experience. The university is also recognized as the "Green campus" by meeting its need for natural resources. The campus is dedicated to the maintenance of ecological balance and has thus left no stone unturned in the development of a green ecosystem to enrich the mind, heart and soul of the students. About 45% of the area in the university campus is developed as gardens. There are approximately 2500 trees, 5500 ornamental plants and the grass cover in 8 acres. About 33.4 acre land is used for different agricultural crops as per the season. Ashoka, Ficus Religeosa, Boganvella, Aleovera, Eucalyptus, Azadirachta and many more types of plants and trees are available as per geographical regime. In addition to this, Medicinal plant nursery is also available in the campus premises which are maintained by horticulture department.

Seven tree plantation drives are organized every year by the campus and approximately 600 trees and 1000 shrubs were planted in the financial year 2019-20. Also, the university adopted five villages, where tree plantation is also an activity, under UBA scheme of Govt. of India. Besides, various trees also planted under ownership program, where plots are allotted to the students by Department of Agriculture for practice.
