

Laboratories

The University has well equipped separate labs for teaching and research. The labs take care of the instruction on Computer Fundamentals to all students. Students use resources of the laboratories to solve problems, perform developmental experiments and work on projects guided by faculty. By permitting longer hour's lab facility and access to the network from each class room and lecture theatre, information is made easily accessible from any point within the campus. The students are provided Wi-Fi connections in their hostel rooms to give them the opportunity to spend time exploring and utilizing the resources offered through the Intranet and Internet. The experiments are designed to provide deeper understanding of phenomenon, facts and fabrication/assembling of equipment from components to get hands-on experience. The drudgery of repetitive measurements is reduced by shift forwards micro computer based laboratory which allows the detailed analysis and interpretation of acquired data for our students.

The details of **Laboratories** of Chaksu and Sitapura campus are given in a tabular form. The geo tagged **Laboratories** photos are also attached.
