

GENERATOR LOG BOOK AND MAINTENANCE

The University has 160 KVA capacity generator in the campus to provide 24x7 power back supply. For smooth functioning of the generator the University also maintains the generator log book separately which consist date and time including duration of usage (units consumed) so that the requirement of diesel for the generator can be known prior and filled in time. The Maintenance department is responsible for the timely maintenance of generator as and when required.

Overview & Full Specifications of Mahindra Powerol 62205 GC 160 KVA Generator

Mahindra is a multifaceted brand that has built towering reputation of manufacturing engines and diesel generator sets. These generators supply back-up power to areas where uninterrupted power supply is a must-have to reach the goal. Mahindra's reliable and practical power solutions are mostly found in telecom, banking, office buildings, healthcare and so many other sectors. Mahindra Powerol 62205 GC 160KVA generator gives you quality assurance and matchless service simultaneously.

Size and Dimension:

Mahindra Powerol 62205 GC 160KVA is a huge unit. Therefore it is better to install the machine outdoor. The whole unit comes in a bright yellow exterior which looks glossy. Its robust frame is capable enough to withstand harsh climatic conditions and any physical abrasion. This large unit comes in a size dimension of 3905 x 1600 x 1935 mm (L x W x H) and it weighs more than 2500 Kg.

Technical Features:

Mahindra Powerol 62205 GC 160KVA is a diesel generator with Mahindra Powerol 62205 GC engine. Rated Output of the engine is 146 kW with 100% load and Overload Power is 161 kW with 110% load. It comes with a Turbocharged, After Cooled Aspiration system. The machine has Liquid Cooling System with Radiator. Electronic A1 Governor is IS 10000 certified. This 3-phase motor consists of 6 cylinders with Compression Ratio of 18.1 and Displacement of 8.27 litre. Lube Oil Sump Capacity is 19 litre and total Coolant Capacity is 26.2 litre. The machine is paired with a 180 Ah battery.

Application:

This Mahindra Powerol generator unit is meant for domestic and small sized business requirements. The unit can be placed indoor as it complies with the most stringent noise and emission standards specified by Central Pollution Control Board of India (CPCB).

Any Other Features:

Mahindra Powerol 62205 GC 160KVA is a value for money product. Once it starts working, you will forget those

Generator Note sheet

At Starting the generator was showing problem by not taking load and making loud noise while starting & working. The mechanic told us that the controller card is not working and the system needs some service also.

The controller card was replaced but we were facing the same problem. The senior generator Engineer was called from the authorized workshop he told us that the controller card is Ok but the problem was in actuator. He replaced the actuator and Generator started working properly.

After 2-3 days we find another problem that self stop working which was repaired by the approval of chairman sir.

On 12 Aug 15 Generator Self was repaired when mechanic fixed that self in the system. It start working but after some time Generator has been automatically stopped. The mechanic inspected & analysis the problem and he suggested to call service engineer immediately . To check the problem otherwise stare motor may burn again.

13 Aug morning we call a service engineer from the Mahindra authorized service station. He checked complete generator.

1. New Actuator is working properly
2. Now Self stator motor is working properly
3. Controller card is working properly.
4. LLOP switch is not working which is responsible for censing the oil pressure of the generator.(already approved by Chairman sir) indicates the Oil Pressure
5. Main Controller unit (according to engineer) hangs any time. (Procon Unit INCT)
According to him the function of the controller Unit is that to save the generator and to stop immediately if there is some problem like low fuel or high temp , low oil pressure or any other relevant parameter which if will not be sensed then whole generator will fail.

It is recommended by the service engineer to change the controller unit as soon as possible.

Note:-

Procon Unit was damaged previously also (Nov -2013) & was purchased @ appox 8800/-
