

PROCESS OF PROCURING THE MATERIALS

The requirements received from different departments are sent directly to the maintenance department for further process of procurement. The Estate Manager then sends the list of items to different shops/firms for the estimate. The estimate received will be compared both in terms of price as well as quality and the recommended quotation escalates to Board of Management for approval. After the approval, the concerned firm/shop releases the purchase order and deliver items within stipulated time as mentioned. The procured items are checked at the security gate by ensuring the proper entry of the items in the register before delivering to the maintenance department. The Estate manager is responsible for the stock entry in the respective stock register and supply to the concerned department.
